

LCD Wipes

LCD professional wipes adopts microfiber, the single fibre diameter is less than 0.08 denier, the protection effectiveness to the precision surface is more than the common magic cloth or common microfiber. And, it has the features of soft, absorbent and lint-free. The fabric can easily remove dust, oil, fingerprint and static, but never scratch the surface of the LCD.

The cleaning liquid adopts Germany IT technical and recipe, the security features is more than the water based or electrolyte based liquid. The clean liquid doesn't contain any impurity, could clear dust, static and quickly remove the dirty spots. Furthermore, after cleaning, the special glue molecule in the liquid will come into being a protection layer on the LCD surface and offer the LCD longer time protection than common type.

RIWAY

Applications:

- Computer screens
- Desktops, laptops, notebooks
- Large screen TV's
- Plastic TV screens
- PDA's-personal digital assistants
- Lenses
- Cameras and video cameras
- LCD read-outs
- Lab equipment
- Safety glasses
- Personal electronics
- Projectors
- Telescopes, binoculars and transits
- Computer operated machinery

Features:

1. Manufactured in state-of-the-art class 10 cleanrooms
2. Dual packaging allows easy surface de-contamination prior to use
3. Can also be used in traditional, non-cleanroom laboratories
4. Disposable
5. One year shelf life at room temperature

Specifications:

- Basis Weight: 50gsm~150gsm
- Size: 10X10cm, 20x20cm, or be specified
- Colors: white or solid color
