

Dispenser Towel Rolls

Most of the people don't want to use the wet towels for airline cotton towel worrying it doesn't meet the sanitary standard or worrying the contained antiseptic will be bad for our skin. So, most of the people prefer paper towels to wet tissue even it has a lot of lint left behind using. At such situation, the fresh made nonwoven dispenser towels with towel dispenser is a good option for the people.

The nonwoven dispenser towel rolls are made of 100% viscose, has

good absorbency. The features are soft, lint free and 100% biodegradable. The used nonwoven towels can be easily decomposed within 3 months in the nature. So, it is also called environment friendly products or green products. As per upper picture showing, the nonwoven towel rolls is 30 meters long, one dispenser towel roll can make around 130pcs nonwoven towels. Following pictures show the process of filling towel rolls into the towel dispenser:
